三．閱讀理解：細心閱讀文章，把答案填在橫線上，選擇題 則在○內塗黑。

The capybara is the world's largest rodent, native to South America. Renowned for its amicable nature, the capybara is often spotted near water bodies, as it is an excellent swimmer. Sporting a distinctive appearance with a barrel-shaped body, short legs, and webbed feet, these social creatures thrive in groups. Their semi-aquatic lifestyle, coupled with a herbivorous diet, makes them fascinating inhabitants of wetlands and grassy regions, fostering a unique ecological niche. Capybaras engage in communal activities, reinforcing bonds through grooming and vocalizations, showcasing their intriguing social dynamics.

1. What is the capybara's primary habitat?
 - A. Mountains
 - B. Deserts
 - C. Wetlands and grassy regions
 - D. Tundra
2. Why are capybaras often found near water bodies?
 - A. They enjoy sunbathing
 - B. They are excellent swimmers
 - C. To avoid predators
 - D. They dislike dry environments
3. Describe the physical features that contribute to the capybara's distinctive appearance.

4. Explain the significance of the capybara's webbed feet in its semi-aquatic lifestyle.

5. What is a key characteristic of capybaras' behavior?
 - A. Aggressive nature
 - B. Solitary lifestyle
 - C. Communal activities
 - D. Nocturnal habits
6. Elaborate on how capybaras reinforce bonds within their social groups.

7. What type of diet do capybaras have?
 - A. Carnivorous
 - B. Omnivorous
 - C. Herbivorous
 - D. Insectivorous

四．填充：使用正確的關係代名詞完成下列句子。

1. The student _____ excelled in mathematics was awarded a scholarship.
2. The detective was unsure _____ had committed the crime until further investigation.
3. The person to _____ the lost wallet belongs, please come to the lost and found.
